constant mean curvature surfaces with boundary rafael l opez - in physics of interfaces and capillary phenomena. for example, in the absence of gravity, the shape of an interface m in physical equilibrium is given by the laplace equation $p_{ext} - p_{ins} = 2h$, which measures the difference of pressures between the exterior p_{ext} and the inside p_{ins} in terms of the mean curvature h of m and the surface tension of the interface. two classical results, namely, the ... **grundlehren der mathematischen wissenschaften 284** - robert finn equilibrium capillary surfaces with 98 illustrations springer-verlag new york berlin heidelberg tokyo **problems submitted to international mathematical olympiads** - 2 minimal surfaces i. books & monographs 2012 a theory of branched minimal surfaces tromba, anthony springer monographs in mathematics. springer, heidelberg, 2012. x+191 pp. **micro-macro modelling and simulation of liquid-vapour flows** - micro-macro modelling and simulation of liquid-vapour flows dfg-cnrs surface tension and molecular dynamics hans wilhelm alt (tu munich, germany) the continuum definition **references** - **web.utexas** - 1838 oberwolfach report 33/2014 ∂^*e , then there exists a closed set $\Sigma \subset m$ such that $m \setminus \Sigma$ is "as smooth as g allows it to be" and Σ has hausdorff dimension at most $n - 8$. **a uniqueness theorem for the minimal surface equation on ...** - pacific journal of mathematics vol. 177, no. 1, 1997 a uniqueness theorem for the minimal surface equation on an unbounded domain in \mathbb{R}^2 chin-chuan lee **a list of examples** - **springer** - a list of examples under this headline we have collected a list of facts, ideas and principles illustrating the general theory in specific relevant situations.
